Hi

Looks ok now. I will add your code to the next version of robocode. I just need to do the same for .NET version.

If you would like to programe it - you are welcome :-)

Flemming

Hi

Comments added.

2013/5/14 Flemming Larsen <femmlar@gmail.com>

Hi

I checked your code and it seems ok to me. Graph is nice, but you have forgotten comments for javadoc. So could you add them?

Thanks

Flemming

Hi

Ok I will.

Flemming

Hi,

I have just submitted my code changes on my git fork. I have added graph to battle results statistics. You can also switch between values which you are interested in.

Could you check the code and say me your opinion?

Thanks Ondra

Hi,

of course you are welcome to join robocode. Do what ever you like. Just make a fork of Robocode on gitHub and notify me when you commit something.

Flemming

Cituji gamachain@gmailcom:

Hi,

Lately I was searching for Java open source game, in which I could get involved. Is there any chance I could contribute to the Robocode? I am pretty decent Java programmer and I would like to gain some basic game developing experience. I have already downloaded and checked source code of Robocode and I could start with something small like feature: <https://sourceforge.net/p/robocode/feature-requests/143/> - end game statistics graph. I could send you my idea how it could look like if you want. Please let me know about your opinion.

Thanks Ondrej Hrcuba
