jEdit – opensource text editor

A4M35OSP – Daniel Rys

About project

- Developed in Java
- Platform-independent
- Supports majority of programming language syntaxes (over 200)
- GPL 2.0

Community

- Uses git as a versioning systém
- Source accessible on Sourceforge
- Communication – forum, bug tracker

Development

- Open for plugins

- Living project, many contributors (developers and reporting users)

- Daily builds – the newest version always available

My work

- Contact developers and repair a bug

- preferably bug no. 3810 (the comment character of javascript in html is wrong)

- Send a patch with the fix to the developers
