About Evince

- Simple document viewer

- Supports almost all most important formats

- Available for Linux and versions of Windows OSs.

- Can be obtained from distributions for Linux or from application's website for each OS type

Development of Evince

- It goes as a part of GNOME project
- Licensed under GPL 2.0+
- Started on 12/2004 as a fork of Gpdf
- 106 contributors
- For the last one month and 12 months 107 commits by 52 contributors and 504 commits by 106 contributors

Technical details

- 72K lines of code

- 10K lines of comments

- Mostly implemented on C (90%) and then on C++ (5%) and other scripting languages

My contribution

- Fixing bug:

When one views PDF documents where comments/annotations are attached and by clicking on File menu chooses "open a copy" the program gets crashed
